- Regional harvest limit is set IAW survey data. When the regional limit is reached, all areas within the region will close.
- Individual area limits spread the regional total across habitat while allowing for some variation based on area availability.
- Archery Only season limits are a subset of the individual area limit and harvests during Archery Only season will count toward the area limit.

Note: Wild pigs may be harvested in unlimited numbers during legal hunting activities. All harvested pigs, deer, and turkeys must be brought to the game check station (Bldg 1944)
